

SPRINGBOOT INTEGRATION WITH GOOGLE MAPS API

DR. B L N PHANEENDRA KUMAR (8215)

ASSISTANT PROFESSOR

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

KL DEEMED TO BE UNIVERSITY

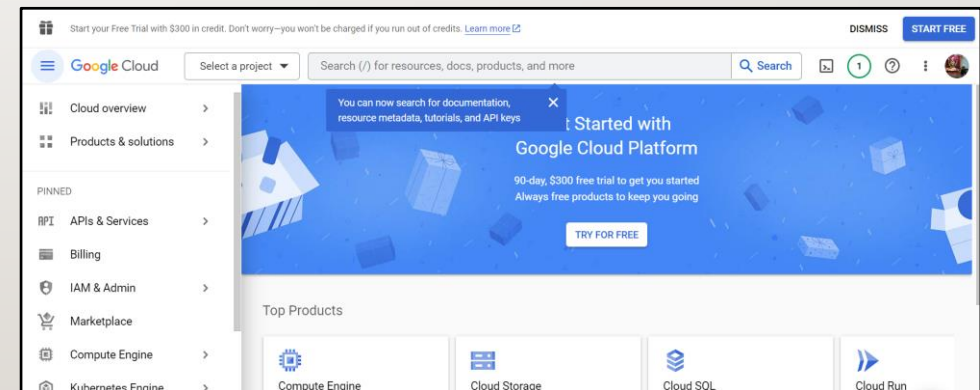

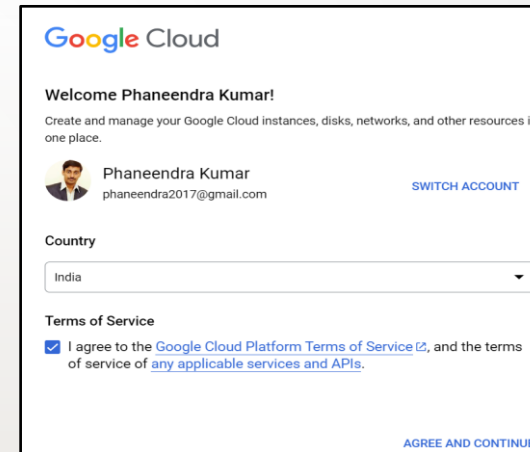

VADDESWARAM

STEPS TO BE DONE

- Generation of Google Map API Key
- Creation of Controller Java class
- Creation of index.html file which contain the information to be displayed on map

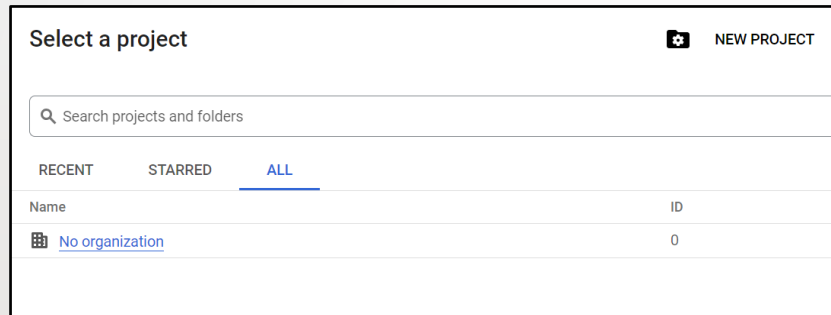

GENERATION OF GOOGLE MAP API KEY

1. Goto website <https://console.cloud.google.com/getting-started>
2. Login through your mail
3. Check the Terms of Service and click on Agree and continue
4. From the dropdown list 'Select a project' option

GENERATION OF GOOGLE MAP API KEY CONTD..

5. Then, click on New Project (shown on top rightside)

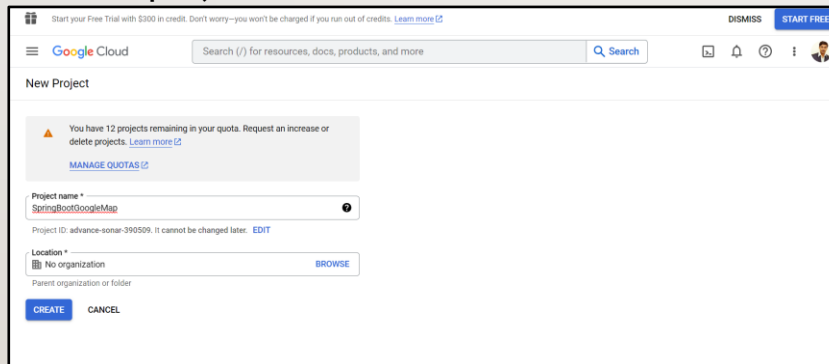

Select a project NEW PROJECT

Search projects and folders

RECENT STARRED ALL

Name	ID
No organization	0

6. Provide a project name and click on Create button

Start your Free Trial with \$300 in credit. Don't worry—you won't be charged if you run out of credits. [Learn more](#)

DISMISS START FREE

Google Cloud Search (/) for resources, docs, products, and more Search

New Project

You have 12 projects remaining in your quota. Request an increase or delete projects. [Learn more](#)

[MANAGE QUOTAS](#)

Project name *

Project ID: advance-sonar-390509. It cannot be changed later. [EDIT](#)

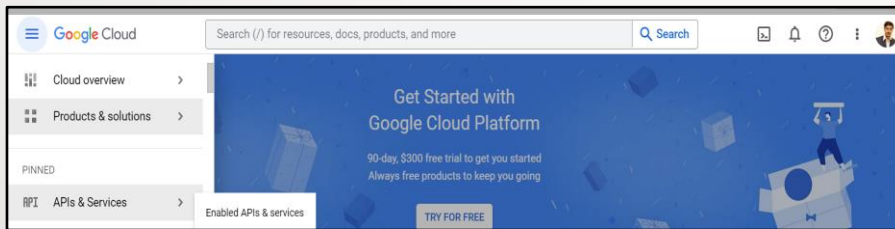

Location * [BROWSE](#)

Parent organization or folder

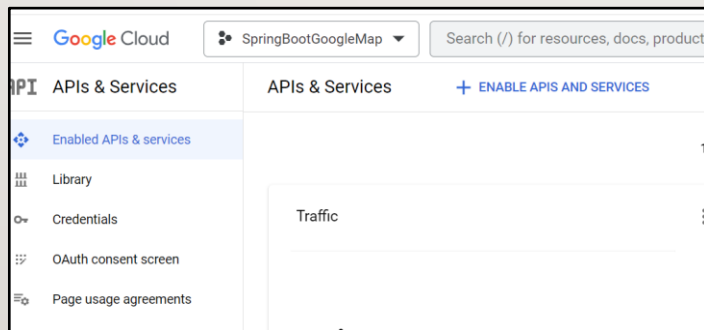

CREATE CANCEL

GENERATION OF GOOGLE MAP API KEY CONTD..

7. On the navigation menu, Select 'APIs & Services' and from the list of options, select the Enabled APIs&services

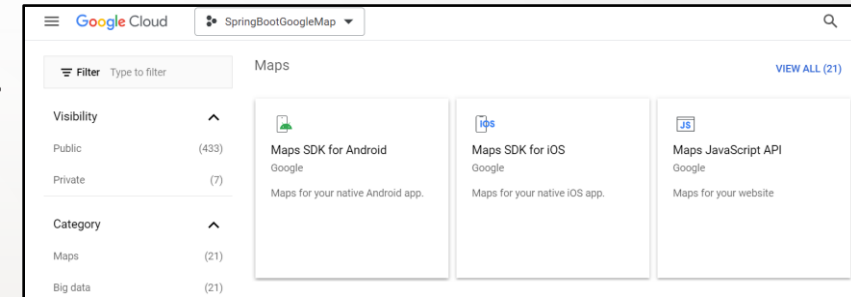

8. Click on Enable on ENABLE APIS AND SERVICES

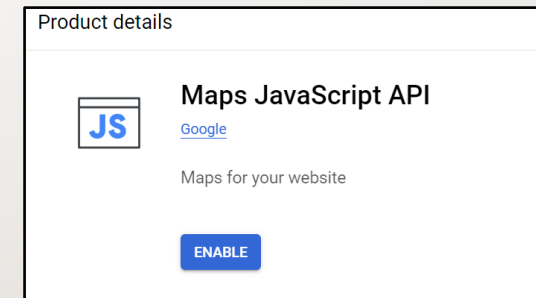

GENERATION OF GOOGLE MAP API KEY CONTD..

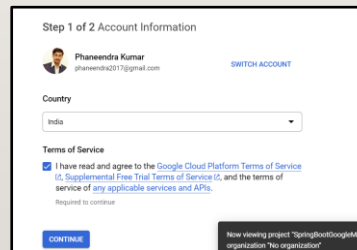

9. Then, Select Maps JavaScript API from the MAPs list

10. Click on ENABLE button

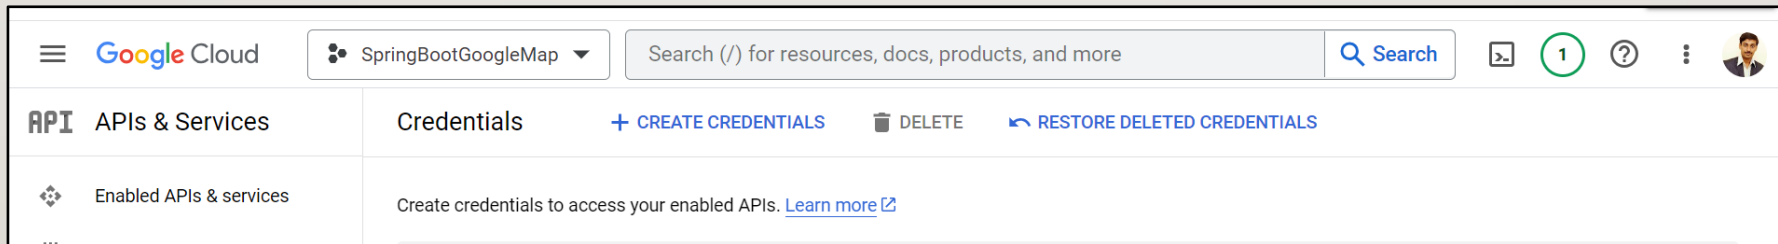

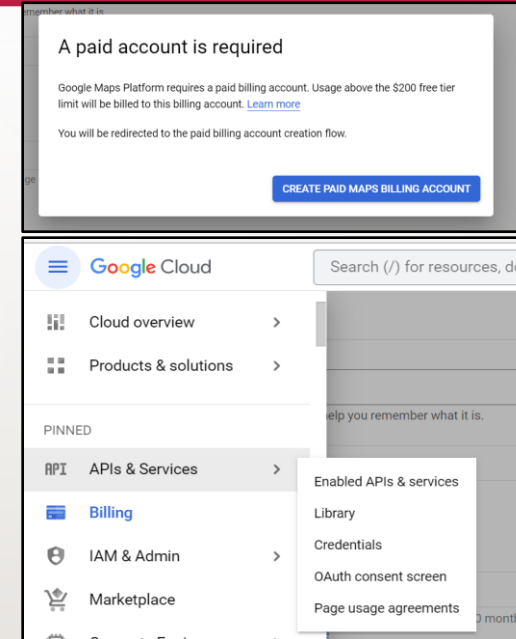

11. Select the Check box Terms of Service and click on Continue

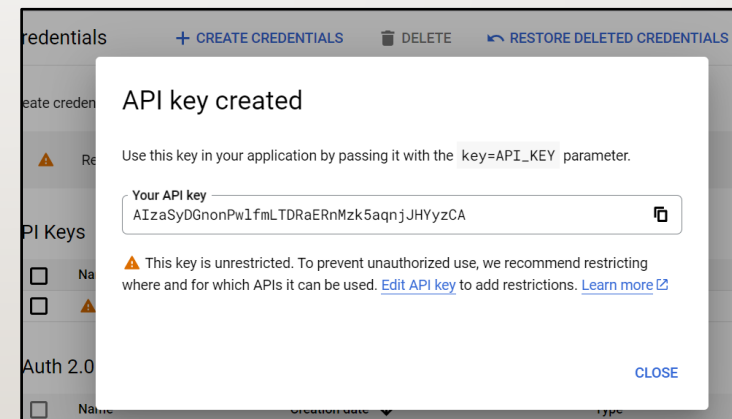

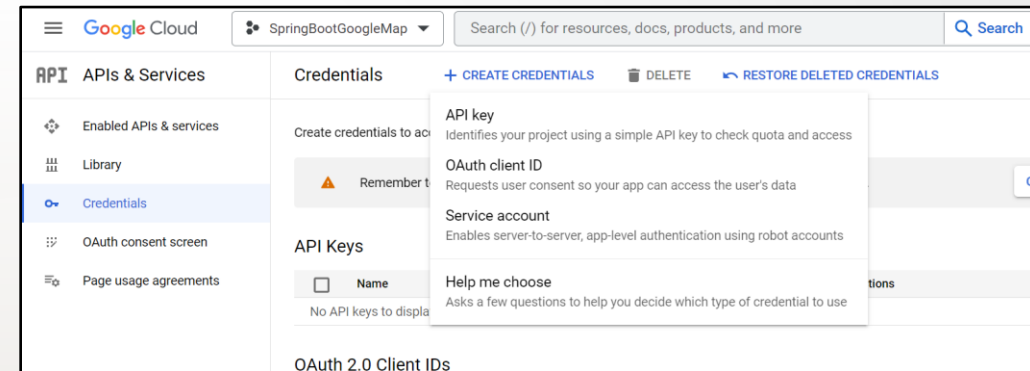

GENERATION OF GOOGLE MAP API KEY CONTD..

12. It will ask for payment
13. Donot pay anything (Press Esc button)
14. Again click on Navigation Menu
 - a. Select API&Services and go to Credentials
15. Click on Create Credentials

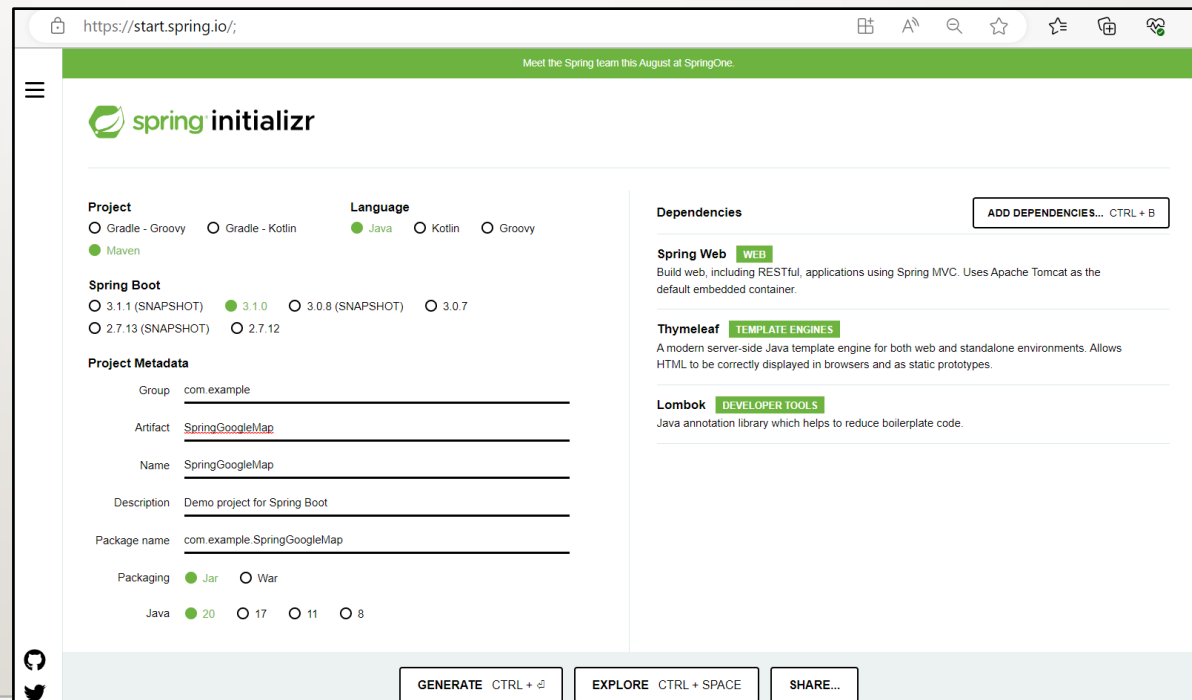

- Then, Click on API Key
- It will create an API key
 - Copy and save it in a note pad
- Then click on close

CREATION OF SPRINGBOOT PROJECT

- Go to the SpringInitializr web site and create a project with necessary language, build tool, Java version and finally the required dependencies as shown below
- Then, Click on Generate

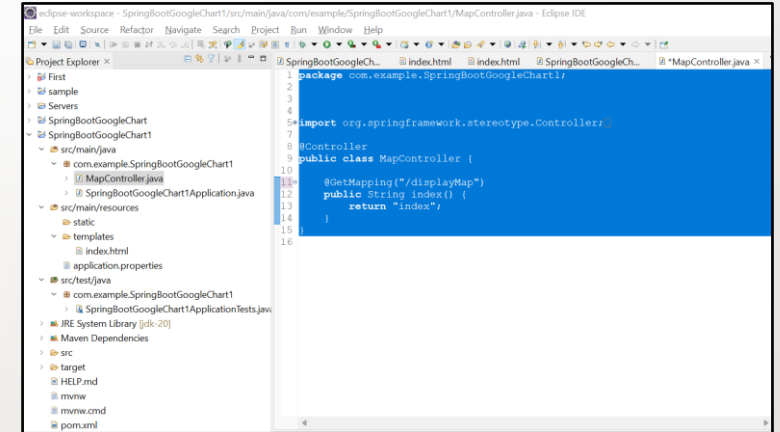

The screenshot shows the Spring Initializr web application at <https://start.spring.io/>. The interface is divided into several sections for configuring a new Spring Boot project:

- Project:** Includes radio buttons for **Gradle - Groovy**, **Gradle - Kotlin**, **Maven** (selected), and **Language** options: **Java** (selected), **Kotlin**, and **Groovy**.
- Spring Boot:** Includes radio buttons for versions: **3.1.1 (SNAPSHOT)**, **3.1.0** (selected), **3.0.8 (SNAPSHOT)**, **3.0.7**, **2.7.13 (SNAPSHOT)**, and **2.7.12**.
- Project Metadata:** Includes text input fields for **Group** (com.example), **Artifact** (SpringGoogleMap), **Name** (SpringGoogleMap), **Description** (Demo project for Spring Boot), and **Package name** (com.example.SpringGoogleMap).
- Packaging:** Includes radio buttons for **Jar** (selected) and **War**.
- Java:** Includes radio buttons for versions: **20** (selected), **17**, **11**, and **8**.
- Dependencies:** Includes a button **ADD DEPENDENCIES... CTRL + B** and a list of selected dependencies: **Spring Web** (WEB), **Thymeleaf** (TEMPLATE ENGINES), and **Lombok** (DEVELOPER TOOLS).

At the bottom, there are three buttons: **GENERATE CTRL + G**, **EXPLORE CTRL + SPACE**, and **SHARE...**

FILES REQUIRED TO DISPLAY GOOGLE MAPS

- Controller Class (MapController.java)
 - Create the java file under
 - Helps to invoke with the specified extension (@GetMapping)
- Html file (index.html)
 - Under Templates create index.html
- Required dependencies such as SpringWeb, Thymeleaf and Lombok are added in pom.xml

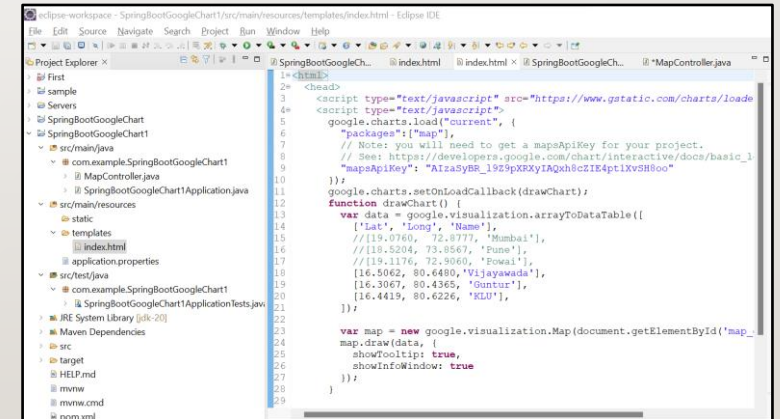

```

package com.example.springbootgooglechart;

import org.springframework.stereotype.Controller;

@Controller
public class MapController {

    @GetMapping("/displayMap")
    public String index() {
        return "index";
    }
}
  
```

```

<html>
<head>
<script type="text/javascript" src="https://www.gstatic.com/charts/loader.js">
</script>
<script type="text/javascript">
    google.charts.load("current", {
        "packages": ["map"],
        // Note: you will need to get a mapApiKey for your project.
        // See: https://developers.google.com/chart/interactive/docs/basic_1
        "mapApiKey": "AIzaSyB8_1929pXRXyIAQxh8c2IE4pt1xvSH8oo"
    });
    google.charts.setOnLoadCallback(drawChart);
    function drawChart() {
        var data = google.visualization.arrayToDataTable([
            ['Lat', 'Long', 'Name'],
            [19.0760, 72.8777, 'Mumbai'],
            [19.5204, 73.8567, 'Pune'],
            [19.1176, 72.9060, 'Powai'],
            [16.5062, 80.6480, 'Vijayawada'],
            [16.3067, 80.4365, 'Guntur'],
            [16.4419, 80.6226, 'Eluru'],
        ]);

        var map = new google.visualization.Map(document.getElementById('map'));
        map.draw(data, {
            showToolTips: true,
            showInfoWindow: true
        });
    }
}
  
```

MAPCONTROLLER.JAVA

```
package com.example.SpringBootGoogleChartI;
```

```
import org.springframework.stereotype.Controller;  
import org.springframework.web.bind.annotation.GetMapping;
```

```
@Controller  
public class MapController {  
    @GetMapping("/displayMap")  
    public String index() {  
        return "index";  
    }  
}
```

INDEX.HTML (COPY THE COPIED GOOGLEMAP API CODE IN THE HTML FILE)

```
<html>
<head>
  <script type="text/javascript" src="https://www.gstatic.com/charts/loader.js"></script>
  <script type="text/javascript">
    google.charts.load("current", {
      "packages":["map"],
      // Note: you will need to get a mapsApiKey for your project.
      // See: https://developers.google.com/chart/interactive/docs/basic\_load\_libs#load-settings
      "mapsApiKey": "AlzaSyDGnonPwlfmLTDRaERnMzk5aqnjJHYyzCA"
    });
    google.charts.setOnLoadCallback(drawChart);
    function drawChart() {
      var data = google.visualization.arrayToDataTable([
        ['Lat', 'Long', 'Name'],
        [16.5062, 80.6480, 'Vijayawada'],
        [16.3067, 80.4365, 'Guntur'],
        [16.4419, 80.6226, 'KLU'],
      ]);
      var map = new google.visualization.Map(document.getElementById('map_div'));
      map.draw(data, {
        showTooltip: true,
        showInfoWindow: true
      });
    }
  </script>
</head>
<body>
  <div id="map_div" style="width: 800px; height: 700px"></div>
</body>
</html>
```

Assign the locations, we have
to see on the google map
Enter longitude, latitude

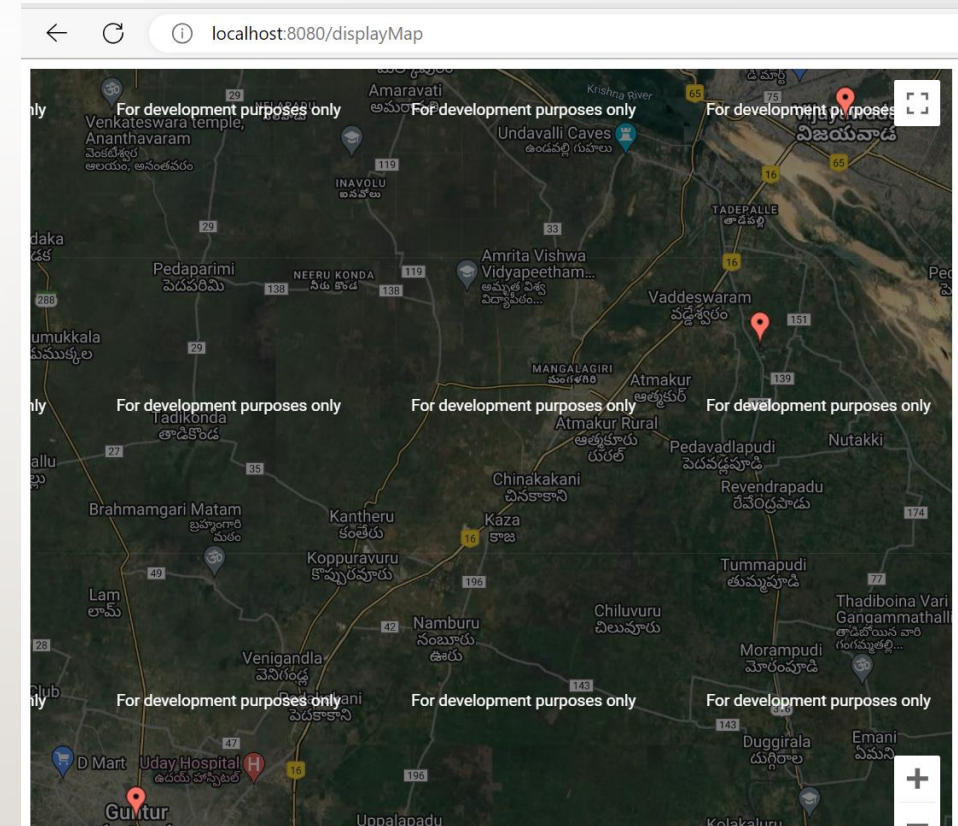

EXECUTING THE PROJECT

- Right click on the java file which contains the main method
 - **Run as Java Application**

- Then, Goto the browser and enter

localhost:8080/displayMap

- We can see the output as shown here

Thank you
